## CREEKS COMPOSTER - RETURNING WASTE TO NATURE

As a globally recognized leader in food waste management, Suzhou Creeks Environment Equipment Co., Ltd. stands at the forefront of the sustainable revolution, championing the cause of green, renewable solutions for daily living. Our journey is fueled by the aspiration to pave a path towards a more sustainable future—where waste is not seen as an end, but a new beginning. Through innovative, environmentally friendly technologies, we aim to transform waste into valuable resources, thus rendering a smooth transition on a journey from garbage to green. Join us in our quest for a cleaner, greener planet.

Creeks is one of the world's leading food waste solution providers. Our success is driven by our hopes of moving towards green renewable sustainable solutions for our everyday day. And that begins with an environmentally sound solution to transform waste into something useful.

Since our founding, Creeks has been at the forefront of the manufacturing industry, providing top-quality products and innovative waste composting management solutions to our clients worldwide.

## TECHNICAL FEATURES OF 10-100KGS

MODEL	Processing Capacity	Composting Bin	Dimension (L*W*H)	Weight	Power	Decomposition Method	Waste Volume Reduction	Processing Time	Deodorization	Material	Control System
CR-10	10kgs/day	50L	750*600*810mm	158kgs	220V/50Hz 1.5KW	Microbial Decomposition (Need to add bacteria)	≥85%	12-24Hours	UV + Activated Carbon	Q235 + Spray Paint + Stainless Steel	Fully Automatic Intelligent Control, Automatic Fault Alarm
CR-30	30kgs/day	100L	1050*700*930mm	265kgs	220V/50Hz 2KW						
CR-50	50kgs/day	180L	1200*800*1050mm	365kgs	220V/50Hz 2.5KW						
CR-100	100kgs/day	400L	1650*1000*1050mm	650kgs	220V/50Hz 4.5KW

### 2022 / BRONZE

# DESIGN AWARD WINNER

## A'DESIGN AWARD & COMPETITION

A' Design Award & Competition is the annual international juried design accolade that manages the World Design Rankings, open to good design work from all countries, in all disciplines, by all entities. Entries to A' Design Award & Competition are blind peer-reviewed and voted on pre-established criteria by the grand jury panel of established academics, influential press members, prominent entrepreneurs and experienced designers, to recognize, highlight, promote and advertise the very best designs worldwide. The ultimate aim of A' Design Award & Competition is to create incentives for designers, brands and businesses worldwide to come up with superior products, projects, services, materials, technologies and experiences that benefit and advance society. A' Design Award & Competition laureate designs are granted this certificate to once again celebrate their design excellence and to praise their high design quality.

## A'DESIGN AWARD & COMPETITION

### Certificate of Excellence

this is to certify that  
*Maozhou Yang*  
has won the Bronze A' Design Award  
in Industrial Equipment and Heavy-duty Appliances Design Category  
in 2022 - 2023 period with design #146125.

15 April 2023, Milan / Italy.

About The Bronze A' Design Award  
The Bronze A' Design Award is a prestigious award given to top 30.0 percentile designs that have demonstrated an exemplary high level of excellence in design. Entries to the A' Design Award are judged by a grand jury panel that brings together World's leading professionals, prominent academics and influential press members. Ranking are based on blind peer-review process where entries are voted anonymously on pre-established evaluation criteria, with strict presentation guidelines and score normalization to remove biases. The ultimate aim of A' Design Award is to create a global awareness and appreciation for good design by featuring and promoting good design worldwide.

Bronze A' Design Award Winner  
in Industrial Equipment and Heavy-duty Appliances Design Category, 2022 - 2023.

Creeks  
by Youking Design

Food Waste Treatment: Designers started with the concept of sustainable development and designed this equipment together with customers. They hope to take the recycling of kitchen waste as an opportunity to let the environmental protection concept penetrate into every restaurant and family, and provide higher quality kitchen waste treatment services for remote islands, plateaus, and other places in need, which can not only reduce the environmental problems caused by kitchen waste but also reduce the pollution caused by back and forth transportation, contribute to carbon neutrality and sustainable development.
